

Note di Matematica

Volume 31, number 1, 2011

C. SEMPI: <i>Bruno Moscatelli remembered</i>	i
A. ALBANESE: <i>On the global C^∞ and Gevrey hypoellipticity on the torus of some classes of degenerate elliptic operators</i>	1
F. ALTOMARE, S. MILELLA, G. MUSCEO: <i>On a class of positive C_0-semigroups of operators on weighted continuous function spaces</i>	15
J. BONET, C. FERNÁNDEZ: <i>Spaces of Moscatelli type. A survey</i>	29
M. CAMPITI, G. MAZZONE, C. TACELLI: <i>Behavior of bivariate interpolation operators at points of discontinuity of the first kind</i>	43
M. CARRIERO, A. LEACI, F. TOMARELLI: <i>About Poincaré Inequalities for Functions Lacking Summability</i>	67
A. DEFANT, U. SCHWARTING: <i>Bohr's radii and strips – a microscopic and a macroscopic view</i>	87
S. FORNARO, G. METAFUNE, D. PALLARA: <i>Analytic semigroups generated in L^p by elliptic operators with high order degeneracy at the boundary</i>	103
C. FRANCHETTI: <i>Possible a priori motivations for the use of Hilbert spaces in Quantum Mechanics</i>	117
M.I. OSTROVSKII: <i>Weak* closures and derived sets in dual Banach spaces</i>	129
D. MUGNOLO, A. RHANDI: <i>On the domain of a Fleming–Viot-type operator on an L^p-space with invariant measure</i>	139
S. OKADA, W.J. RICKER: <i>Ideal properties and integral extension of convolution operators on $L^\infty(G)$</i>	149
E. CORDERO, L. RODINO: <i>Time-Frequency Analysis: Function Spaces and Applications</i>	173
M. VALDIVIA: <i>(LB)-spaces and quasi-reflexivity</i>	191
