

Note di Matematica

Volume 41, number 1, 2021

H. URAKAWA: <i>Harmonic morphisms of compact homogeneous spaces of positive curvature</i>	1
E. BALLICO: <i>Open X-ranks with respect to Segre and Veronese varieties</i>	19
G. CALVARUSO: <i>The Ricci soliton equation for homogeneous Siklos spacetimes</i>	31
C. LI: <i>A note on weakly s-normal subgroups of finite groups</i>	45
T. EZOME, C. GREITHER: <i>Minimal Hopf-Galois Structures on Separable Field Extensions</i>	55
C. PROCESI: <i>A note on the Formanek Weingarten function</i>	69
F.C. SHU: <i>On an autoregressive process driven by a sequence of Gaussian cylindrical random variables</i>	111
